

Course Navigation Tips for Students

The **Table of Contents** (found under Content) is an excellent way to get to where you want to go in your course. It lists the course contents in order, so you can always pick up where you left off. In some courses, you can even track your progress with checkboxes. Here you can even access your **Student Support Getting Started** documents.

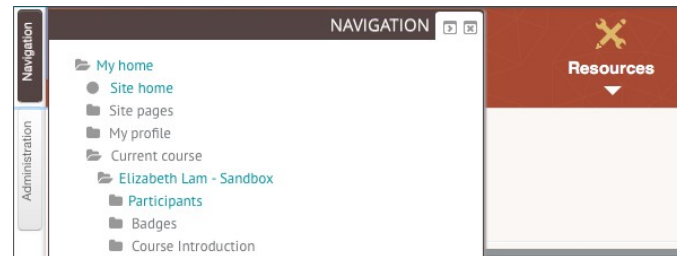

Click on any course page, and you'll see more easy navigation tools. Clicking the **Next** button will take you to the next page in the course while clicking the **Previous** button will take you to the previous page.

Take note of the **navigation path**; every page lists exactly where you are with a simple line of text under the navigation bar. It's clickable too, so you can follow these navigation path breadcrumbs to return back where you came from.

Under Site Navigation

Click, and the entire course structure will appear, with clickable units that reveal everything you find in the **Table of Contents**.
