

The courses in ADLC's online learning management system may each look a bit different, but what makes them easy to use is the navigation bar for all courses is basically the same.

The navigation bar has everything you need for your course.

The **Hamburger Icon** gives you the ability to have a left-hand side navigation or increase your content viewing page.

The **Content** button contains the **Table of Contents**, which has a list of everything you'll need to learn.

The **Resources** button leads to handy tools like a **Calendar**, the course **Glossary**, where you can store your **Private Files**, and a **Help** link to ADLC's help tutorials.

The **Communication** button will take you to course **News** or discussion **Forums**.

The **Grades** button is all about keeping track of your grades.

And last but not least, you can always get help by using the **My Teacher** button.

You can start exploring your course with ADLC's navigation bar right away!
