

The courses in ADLC's online learning management system may contain links to YouTube that students will need to view. This document will help you get a list for your technology department to ensure students have access to these links.

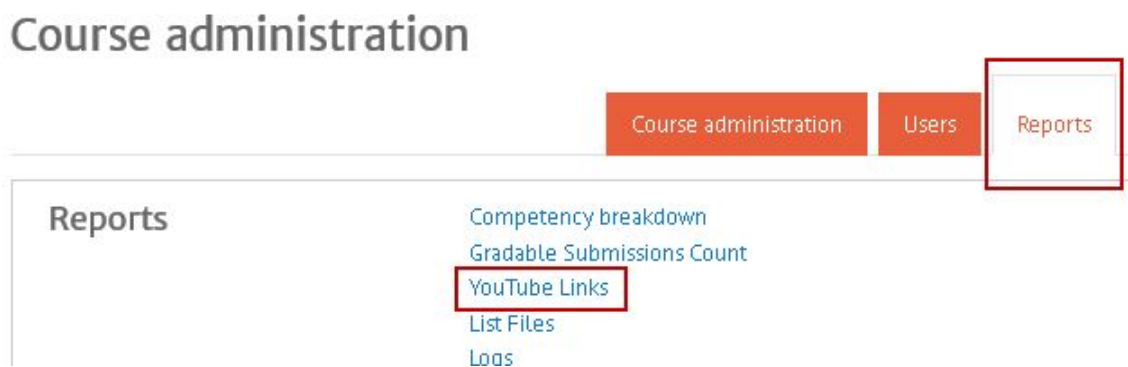

From the Navigation Bar select **Course Management**

Go to **Course settings** tab and select **Course administration**

Go to the **Reports** tab and select **YouTube Links**

A list of all the YouTube videos used in your course will be displayed. Copy this page and paste it into *Notepad (Windows program)*, no formatting of text is necessary. Save as Notepad file and submit it to your technology department.
